OAK

pH 3.60 | TA .58/100ml

VINEYARD

CLONES- WADENSIL, POMMARD AND

COURY PLANTED IN 1965

DRY FARMED | SELF- ROOTED

LAURELWOOD SOIL

Vintage Overview

Reminiscent of a brisk fall forest hike, aromatic notes of dewy moss, fern, spruce tip needles, and wild huckleberry meet with boysenberry and toasted barrel spices to complete the nose of our 2022 old vine Pinot noir. On the palate, the fruit carries through the mid palette, leading to a lingering, long finish, highlighting this elegant, yet bold wine. Showing splendidly now, this old world blend of Pinot noir clones will also age beautifully.

In the Vineyard

In 2022, the vintage in Willamette and Tualatin Valley AVA's started classically wet and cool, highlighted by a frightening cold spell and frost in April that reduced and damaged buds across the valley. David Hill experienced no damage however due to its location in the valley. Cooler than most areas and behind in the growing stage, the vintage was protected. A cooler growing season overall and a dry late harvest season yielded high acid and full fruit, making for a fully ripe vintage. The conditions of this vintage have created wines that are blanched, will full fruit and bright acid.

In the Winery

A blend of the original founding clones of Oregon and aged for 18 months in 20% new French Oak, our Old Vine Pinot Noir is made from 50 year old vines, consisting of Pommard, Wadenswil, and Coury clones.
